How to harvest water and nutrients, select drought-tolerant plants, and create natural diversity Because climatic uncertainty has now become the new normal, many farmers, gardeners and orchard-keepers in North America are desperately seeking ways to adapt their food production to become more resilient in the face of such global weirding. This book draws upon the wisdom and technical knowledge from desert farming traditions all around the world to offer time-tried strategies for: Building greater moisture-holding capacity and nutrients in soils Protecting fields from damaging winds, drought, and floods Harvesting water from uplands to use in rain gardens and terraces filled with perennial crops Delecting fruits, nuts, succulents, and herbaceous perennials that are best suited to warmer, drier climates Gary Paul Nabhan is one of the world s experts on the agricultural traditions of arid lands.
