

The U. S. Space Program (Paperback)

By Roger D Launius

Discovery Enterprises, Limited (MA), United States, 1998. Paperback. Book Condition: New. 183 x 130 mm. Language: English . Brand New Book. NASA Chief Historian Dr. Roger D. Launius highlights several of the many achievements -- and a few of the disastrous failures -- of the space program developed by NASA and sets excerpts from government documents and scientific reports within the context of American society at the time of each new program and launch. Documents and photographs take us from the early unmanned launches to key Kennedy and Nixon decisions, lunar landings, the Challenger accident, the Apollo 13 movie, and to the Mars Pathfinder mission. Launius also introduces the Quest for Extraterrestrial Intelligence in an article by Carl Sagan.

This ebook can be worthy of a go through, and a lot better than other. Better then never, though i am quite late in start reading this one. Its been printed in an exceedingly easy way which is just soon after i finished reading this book where basically modified me, affect the way i really believe.
