Topics that will be emphasized in the proceedings of Developments of Geophysical Turbulence are: the physics and mathematics of turbulence, atmospheric and oceanic turbulence, and historical developments. This symposium continued a long tradition for such symposia going back to the IUGGIUTAM Symposium Fundamental Problems in Turbulence and their Relation to Geophysics, Marseilles, 1961. Contributions to this volume were selected for their suitability to make this volume supplemental reading for a graduate course or to introduce those working in the geophysical and meteorological sciences to recent developments in our understanding of turbulence.
